PROFESSIONAL SUMMARY

B.Tech Computer Science (Data Science) graduate (CGPA 8.59/10.0) with three internships in backend and full-stack engineering. Experienced designing REST APIs, JWT authentication, RBAC, and relational database schemas with transactional integrity using Node.js/Express and Flask, including a 33-table MySQL schema for a multi-role evaluation platform. Comfortable across the stack from database design to React frontends, with additional exposure to applied ML (CNN-LSTM audio classification).

TECHNICAL SKILLS

Languages: Python, Java, JavaScript, C, SQL
Backend & Systems: Node.js, Express.js, Flask, REST API Design, JWT Authentication, RBAC
Databases: MySQL, SQLite, Neo4j, Schema Design, Query Optimization, ACID Transactions
Frontend: React.js, Vite, HTML5, CSS3, JavaScript (ES6+), Responsive Design
Platforms & Tools: Docker, Azure (Blob Storage), Git, GitHub, Linux, Postman
Practices & Core CS: Agile/Scrum, Testing, Logging & Monitoring, OOP, DSA, DBMS, OS, Computer Networks

EXPERIENCE

Backend Engineering Intern (Part-time, On-site)
nDMatrix, Hyderabad | March 2026 – May 2026

- Designed and built a 33-table relational MySQL schema for a multi-module digital evaluation platform, covering submission, evaluation, and annotation workflows across three user roles.
- Built REST APIs in Node.js and Express with role-based access control via reusable middleware, plus JWT-based authentication with token-replay protection.
- Implemented multi-step database transactions (BEGIN/COMMIT/ROLLBACK) for atomic writes, added structured logging for debugging, and collaborated with frontend/backend engineers across Agile sprints.

Software Engineering Intern (Part-time, On-campus)
Vignan University, Guntur | August 2025 – July 2026

- Developed secure multi-stage workflow backends for leave management, payroll, and complaint handling; built a GitHub-style attendance heatmap dashboard to improve administrative visibility.
- Integrated REST-based workflow APIs with progress indicators; added logging/debugging checkpoints; partnered with faculty and engineers across Agile cycles.

Full-Stack Development Intern
Fusil Solutions, Hyderabad | June 2024 – July 2024

- Built a full-stack recipe-sharing web application using Flask, MySQL, HTML, CSS, and JavaScript, including authentication, RESTful CRUD APIs, and a content moderation pipeline with admin analytics dashboard.
- Applied structured input validation across form submissions and tested APIs using Postman, debugging issues during integration testing.

PROJECTS

Real-Time Speech Emotion Recognition — Python, TensorFlow, CNN-LSTM, MFCC, Flask, REST API
github.com/Yesh-219/Speech-emotion-Recognition

- Built a CNN-LSTM deep learning model on the RAVDESS dataset, with an MFCC-based audio preprocessing pipeline, reaching ~99% training accuracy and ~94–95% validation/test accuracy.
- Integrated the trained model into a Flask REST API for inference, with iterative hyperparameter tuning to balance accuracy and generalization.

Recipe-Sharing Web Application — Flask, MySQL/SQLite, HTML, CSS, JavaScript
github.com/Yesh-219/receipe-management-system

- Built user authentication, recipe CRUD operations, search, comments, and cart/discount functionality with REST endpoints and backend validation.

EDUCATION

B.Tech, Computer Science and Engineering (Data Science) — 2022–2026
Vignan's Foundation for Science, Technology and Research, Guntur | CGPA: 8.59/10.0

Intermediate (MPC), Narayana Junior College — 97.5% (2022) | SSC, Oxford High School, Podili — 100% (2020)

CERTIFICATIONS

- Google Cybersecurity Certificate — Coursera (2022); NPTEL Star Certificate — Data Analytics with Python, Pattern Recognition, Responsible AI.

LEADERSHIP & ACHIEVEMENTS

- Yoga Captain, college (1 year); AIU Yogasana participant, competing at the district level.
- AI/ML Workshop (IIT Hyderabad); hackathon participant (Vignan University, VR Siddhartha Eng.); 200+ DSA problems solved.
