PROFESSIONAL SUMMARY

B.Tech Computer Science (Data Science) graduate (CGPA 8.59/10.0) with three internships writing backend and full-stack code in Python, Java and JavaScript. I have built REST APIs, database schemas and web apps (React, Flask, Node.js), solved 200+ DSA problems, and keep my projects public on GitHub. I like testing and debugging my code and working with other engineers in Agile sprints.

TECHNICAL SKILLS

Languages: Python, Java, JavaScript (ES6+), C, SQL
Core CS: DSA, OOP, DBMS, Operating Systems, Computer Networks
Backend & APIs: Node.js, Express.js, Flask, REST API Design, JWT Authentication, RBAC
Frontend: React.js, Vite, HTML5, CSS3, Responsive Design
Databases: MySQL, SQLite, Neo4j, Schema Design, Query Optimization, ACID Transactions
Testing & Debugging: Postman, API Testing, Debugging, Logging & Monitoring
Tools & Platforms: Git, GitHub, Docker, Azure (Blob Storage), Linux; Agile/Scrum

EXPERIENCE

Backend Engineering Intern (Part-time, On-site) — nDMatrix, Hyderabad *March 2026 – May 2026*

- Designed a 33-table relational MySQL schema for a multi-module digital evaluation platform covering submission, evaluation and annotation workflows across three user roles.
- Wrote multi-step database transactions (BEGIN/COMMIT/ROLLBACK) so related writes succeed or fail together, and added structured logging to find and debug issues.
- Built REST APIs in Node.js and Express, with role-based access control through reusable middleware and JWT authentication with token-replay protection.
- Worked with frontend and backend engineers across Agile sprints.

Software Engineering Intern (Part-time, On-campus) — Vignan University, Guntur *August 2025 – July 2026*

- Developed secure multi-stage workflow backends for leave management, payroll and complaint handling.
- Built a GitHub-style attendance heatmap dashboard to give administrators better visibility.
- Integrated REST-based workflow APIs with progress indicators, added logging and debugging checkpoints to track down issues, and worked with faculty and engineers across Agile cycles.

Full-Stack Development Intern — Fusil Solutions, Hyderabad *June 2024 – July 2024*

- Built a full-stack recipe-sharing web application using Flask, MySQL, HTML, CSS and JavaScript, with authentication, RESTful CRUD APIs and a content moderation pipeline with an admin analytics dashboard.
- Added input validation across form submissions, tested APIs with Postman, and debugged issues found during integration testing.

PROJECTS

Real-Time Speech Emotion Recognition — Python, TensorFlow, CNN-LSTM, MFCC, Flask, REST API | github.com/Yesh-219/Speech-emotion-Recognition

- Built a CNN-LSTM model on the RAVDESS dataset with an MFCC-based audio preprocessing pipeline, reaching ~99% training accuracy and ~94–95% validation/test accuracy.
- Integrated the trained model into a Flask REST API for inference, tuning hyperparameters to balance accuracy and generalization.

Recipe-Sharing Web Application — Flask, MySQL/SQLite, HTML, CSS, JavaScript | github.com/Yesh-219/receipe-management-system

- Built user authentication, recipe CRUD, search, comments and cart/discount features with REST endpoints and backend validation.

EDUCATION

B.Tech, Computer Science and Engineering (Data Science) — Vignan's Foundation for Science, Technology and Research, Guntur *2022 – 2026*
CGPA: 8.59/10.0
Intermediate (MPC), Narayana Junior College — 97.5% (2022) | SSC, Oxford High School, Podili — 100% (2020)

CERTIFICATIONS

- Google Cybersecurity Certificate — Coursera (2022)
- NPTEL Star Certificate — Data Analytics with Python, Pattern Recognition, Responsible AI

LEADERSHIP & ACHIEVEMENTS

- AI/ML Workshop (IIT Hyderabad); hackathon participant (Vignan University, VR Siddhartha Eng.); 200+ DSA problems solved.
- Yoga Captain, college (1 year); AIU Yogasana participant, competing at the district level.
